## Omschrijving

Speciaal gereedschap voor het vasthouden en blokkeren van de krukas, zodat de centrale bout op de trillingsdemper los- en vastgedraaid kan worden.

Dit speciaal gereedschap is door ons zo ontwikkeld dat het geschikt is voor veel Nissan-motoren en diverse originele referentienummers. Hierdoor ontstaat een brede dekking van motoren en modellen.

In de houdplaat bevindt zich een langwerpige gat om verschillende hoogtes te compenseren, en twee sleufgaten om aan te passen aan de bevestigingsgaten van de startmotor.

Bij Nissan worden twee verschillende tandprofielen gebruikt voor de blokkering op het vliegwiël. Door de houdplaat om te draaien kunnen beide profielen worden afgedekt.

Geschikt voor de volgende motortypes :

CG12DE, CR12DE, CR14DE, HR16DE, RD28Ti, SD25, YD25DDTi, ZD30DDTi
